PROJECTS

Netflix Clone Website

- Developed a Netflix-inspired web application using **React**, **HTML**, **Tailwind CSS**, and **JavaScript.**
- Integrated **TMDB API** to fetch real-time movie/show data, enhancing dynamic content delivery.
- Designed a **Responsive UI** optimized for mobile-first design, ensuring cross-device compatibility (desktop, tablet, mobile).
- Optimized app performance by implementing lazy loading for images and code splitting, reducing initial load time by **30%**.

Swiggy Clone Website

- Built a Swiggy-like food delivery platform using **React, Redux, Tailwind CSS** and **JavaScript**, integrating the Swiggy API for real-time restaurant and menu data.
- Enhanced UI performance by utilizing React Hooks and Memoization, improving rendering times by **25%**.
- Created a dynamic user interface with restaurant cards and menus that adapt based on real-time data.
- Implemented **Responsive**, mobile-first design principles, ensuring a seamless experience across desktop, tablet, and mobile devices.
